ABOUT US

HANDCRAFTED WHEELS

PI ROPE wheels are handmade: Each spoke, each wheel is individually manufactured by us and adapted to your personal wishes. All (manual) work steps take place in our factory in Chemnitz.

FEATURES

TECHNOLOGY

VECTRAN™:

Our fibre material has only a fifth of the density of steel and at the same time is one and a half times as strong - ideal conditions for making one of the lightest and strongest spokes in the world from it.

PI PROTECT:

Our spokes are treated with our special care product PI PROTECT and receive their unique protection against external mechanical influences.

FEATHERLIGHT:

PI ROPE spokes weigh less than half as much as classic steel spokes - giving you an unbeatable weight advantage.

FEATURES

BENEFITS

WHEELBUILDING:

PI ROPE wheels are assembled and centred with the highest possible precision. With concentricity deviations of less than 0.1 mm, nothing stands in the way of carefree riding pleasure.

QUALITY CONTROL:

Every PI ROPE spoke is tested several times during the production process before it is put into your wheel. This is how we guarantee you a long-lasting product without defects.

FEATURES

BENEFITS

FEATHERLIGHT:

PI ROPE spokes weigh less than half as much as classic steel spokes - giving you an unbeatable weight advantage.

LOAD CAPACITY:

Despite the lower weight, you don't have to worry about the load capacity of your PI ROPE spokes. The breaking load is just as high as that of steel spokes - so nothing stands in the way of your next adventure.

MOUNTAINBIKE

FROM THE ROPE TO THE

SPOKE

It all started with the first mountain bike wheelset: In hardly any other discipline do you benefit as much from PI ROPE wheels as in MTB, which is why our roots lie here. Thanks to the dampening spokes, you'll be able to ride smoother than ever before over any kind of trail, and the low weight will make you go uphill even faster.

Dirt, rain, snow - no problem, your PI ROPE wheels withstand all conditions. From marathon to all-mountain trail, we have the right material for you and your adventure!

MTB

PI ROPE RL ONE A.30

Rim: Newmen Evolution A.30

Weight: 1425 g (27,5") / 1525 g (29")

Material: Aluminium

Inner width rim: 30 mm

Max rider weight: 125 kg

Use: Enduro, All Mountain

MTB

PI ROPE RL ONE X.A.25

Rim: Newmen Evolution X.A.25
Weight: 1225g (27,5") / 1255 g (29")
Material: Aluminium
Inner width rim: 25 mm
Max rider weight: 125 kg
Use: Marathon, XC

MTB

PI ROPE SQUIRREL X.22

Rim: Newmen Advanced X.22

Weight: 1075 g (29")

Material: Carbon

Inner width rim: 22 mm

Max rider weight: 125 kg

Use: Marathon, XC

MTB

PI ROPE ADVANCED A.30

Rim: Newmen Advanced A.30

Weight: 1435g (29")

Material: Carbon

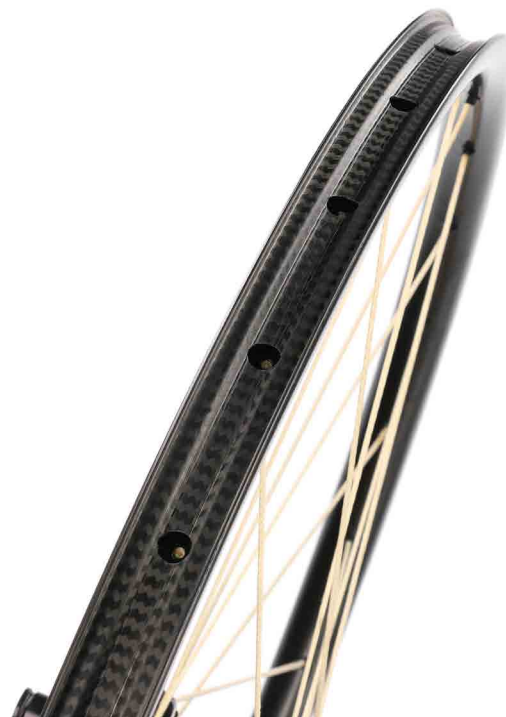

Inner width rim: 30 mm

Max rider weight: 125 kg

Use: All Mountain

MTB

PI ROPE RL SUB1.1

Rim: Bike Ahead THERim SL24

Weight: 1005 g (29")

Material: Carbon

Inner width rim: 24 mm

Max rider weight: 90 kg

Use: Marathon, XC

PI ROPE

FOR ALL THOSE WHO

RIDE LEFTY

Do you ride Lefty and haven't found the right wheelset yet? All our models can be fitted with the right hub for your Lefty.

PI ROPE

RROAD / GRAVEL

RIDE IT

ROAD

We can do more than just mountain biking: Whether it's an after-work ride, a Strava KOM or a competition - PI ROPE road bike wheels bring you closer to every goal. Regardless of whether you prefer to glide over the asphalt with maximum efficiency or feel most comfortable with gravel and CX, we provide the necessary speed.

With the combination of our super-light yet durable spokes, Newmen quality hubs and aerodynamically optimised rims, nothing can stop you.
